The 110th anniversary since the birth of famous scientist V. S. Ivlev and, soon, the 100th anniversary since the birth of well known researcher I. V. Ivleva will be celebrated in 2017. Their works were pioneering for science; they made a significant contribution to hydrobiology, general ecology, evolutionary and ecological physiology of aquatic animals, theory and practice of aquaculture. Works of these outstanding scientists determined the development of these directions for many years. Many articles and monographs of V. S. Ivlev and I. V. Ivleva remain relevant even today; modern scientists develop their ideas and continue their researches.

In 1959 Ivlev and Ivleva have established the Department of Marine animal physiology at Kovalevsky Institute of Biology of the Southern Seas, where their disciples and followers work until now. The Scientific Conference is organized primarily by the efforts of the Department staff.

Scientific program will include reports on the following themes:

- 1. V. S. Ivlev and I. V. Ivleva: life, studies, and contribution to the development of hydrobiology.**
- 2. Ecological physiology, acclimation and adaptation of hydrobionts.**
- 3. Feeding, behavior and biotic relationships of hydrobionts.**
- 4. Concepts and approaches of modern ecology.**
- 5. Biological basis of aquaculture.**

Presentation can be oral (15 min.) or poster (A1 format, 59.4 × 84.1 cm).

Working languages: Russian and English.

Registration fee for all the foreign participants is 50 USD. The organizing committee apologize for can't provide financial support to participants from other cities, inviting them to take part in the conference.
